

Your location. Our investment. Shared growth.

Turn your property into an EV charging destination.

KURNT partners with fuel stations, commercial property owners, retail destinations and hospitality businesses to develop and operate high-speed electric vehicle charging stations across Pakistan.

We bring the charging infrastructure, technical expertise and operational management. You provide a strategically located space with suitable access and electrical infrastructure. Together, we create a new revenue opportunity while helping build Pakistan's electric mobility network.

Who does what

What KURNT brings

Charging equipment

Investment in EV chargers and associated charging infrastructure.

Installation and commissioning

Management of installation, testing and deployment.

Daily operations

Charging operations, monitoring and ongoing management.

Maintenance

Charger maintenance and technical support.

Commercial management

Charging revenue collection and reporting.

What location partners provide

Dedicated space

An agreed area for charging equipment and vehicle bays.

Vehicle access

Suitable access for drivers to enter, charge and exit.

Electricity access

An agreed electrical connection and metering arrangement, subject to site assessment.

Site cooperation

Access and permissions needed for installation, maintenance and operations.

How the partnership works

Our location partnerships are structured around long-term commercial arrangements. Depending on the property and project economics, KURNT may offer a revenue-sharing arrangement under which the location partner receives an agreed percentage of charging revenue.

Commercial terms, site requirements and investment responsibilities are confirmed following a location assessment.

From location to live charging

01 Submit your location

Tell us where your property is and what facilities are available.

02 Site assessment

We evaluate accessibility, electricity availability, charger placement and commercial potential.

03 Partnership agreement

We agree on responsibilities, commercial terms and the operating arrangement.

04 Installation and launch

KURNT coordinates installation, commissioning and operational launch.

Let's power the next destination.

Own or operate a property that could accommodate an EV charging station? Submit your location at the address below, or email us.
